The block that stays 2
The block that moves 3

mPDF

What a kept block carries with it

Two blocks below are kept together. The first fits where it is; the second does not and moves to the next page. Each carries the same things: a page number, a link, an anchor and a link to it, a bookmark, a contents entry, an index entry, a text field, a note, a gradient, a cell with a picture in its background, and a kept block inside it. Each is registered once, for the page the block ends up on, as the contents in front and the index at the back show.

Filler line 1 before the block that stays.

To the anchor in the block that stays

This block stays. It is on page 2.

A link and the anchor the link above points at.

A field

A gradient behind this line.

A picture tiled behind this cell.	A plain cell.

A kept block inside the kept block.

Block text, line 1.

Block text, line 2.

Block text, line 3.

Block text, line 4.

Block text, line 5.

Block text, line 6.

Filler line 1 before the block that moves.

Filler line 2 before the block that moves.

Filler line 3 before the block that moves.

Filler line 4 before the block that moves.

Filler line 5 before the block that moves.

Filler line 6 before the block that moves.

Filler line 7 before the block that moves.

To the anchor in the block that moves

This block moves. It is on page 3.

A link and the anchor the link above points at.

A field

A gradient behind this line.

A picture tiled behind this cell.	A plain cell.

A kept block inside the kept block.

Block text, line 1.

Block text, line 2.
