

page-break-inside: avoid

The block below is too tall for what is left of this page, so it moves to the next one whole. Its coloured panels move with it, and nothing of them is left behind here. The plain table above is what puts the backgrounds on the page in the first place.

A table before the block, with no background of its own

Filler line 1, here to push the block over the page boundary.

Filler line 2, here to push the block over the page boundary.

Filler line 3, here to push the block over the page boundary.

Filler line 4, here to push the block over the page boundary.

Filler line 5, here to push the block over the page boundary.

Filler line 6, here to push the block over the page boundary.

Filler line 7, here to push the block over the page boundary.

Filler line 8, here to push the block over the page boundary.

Filler line 9, here to push the block over the page boundary.

Filler line 10, here to push the block over the page boundary.
