A ">" in the attributes of tags read before the document is drawn

An <html> with a ">" in its title before lang="fr": the next line is orange.

Orange text

A stylesheet linked by a <link> with a ">" in its title, and rel after href: the next line is green.

Green text

A <style> with a ">" in its title, for print, with a data-media of screen after it: the next line is blue.

Blue text

A table with a ">" in its summary: the caption "The caption" above a table of one cell.

The caption

cell

A link titled "draw <svg>", then a line and an inline SVG: "link", "Middle", a red square and "After".

link
Middle

After

A block with an SVG in a data URI as its background: a box of small blue squares reading "box", and nothing else.

box

SVG text with a ">" in an attribute: "Hello", then a Hebrew word in a Hebrew font.

Hello שלום

An index entry whose span has a title holding "1:2": the index lists "Mammals", then "- Elephants 1" under it.

Entry
Mammals
- Elephants 1
