SVG references with a ">" in another attribute

A <use> with a ">" in a data attribute: a red square at the left, and a copy of it moved to the right.

A <use> with an end tag and a ">" after its reference: a green square in the middle.

A <use> of "#b", after a red rectangle with data-id="b": a blue square, and no red.

A gradient that links to another, with a ">" in a data attribute: a bar shading from red on the left to blue on the right.

A <tref> with a ">" in a data attribute, of "#t", after a text with data-id="t": the word "Right" only.

Right

An empty <markers/> and an empty <pattern/> before a red square, then a <marker>: a red square.
