Page 1: break-after

Each red box has one paragraph with a break value that forces no page. Each box is drawn once, with both paragraphs inside it.

First paragraph
Second paragraph, break-before: auto

First paragraph
Second paragraph, break-before: avoid

First paragraph
Second paragraph, break-before: column

This paragraph has break-after: page, so the next section starts on page 2.

Page 2: break-before: recto

Margins are mirrored. The next heading has break-before: recto, so it starts on the next odd page, page 3, and page 2 is otherwise empty.

Page 3: break-before: verso

The next heading has break-before: verso, so it starts on the next even page, page 4.

Page 4: break-inside: avoid-page

The blue box after the grey lines has break-inside: avoid-page. It would start at the foot of this page, so it is moved whole to page 5.
