TestEmoji-COLRv1: each emoji tests a kind of paint, and may look unfinished

1 
Grinning face
A radial gradient from white to yellow, and the mouth in the colour of the text, red in the red paragraph.

2 
Heart
A linear gradient over a square, kept to the heart by SRC_IN, and a half-transparent shine.

3 
Man
The face and eyes scaled to 80% about the face's centre.

4 
Woman
A reflected linear gradient whose alpha varies, which draws the stripes. Preview, which draws no soft mask inside a Type3 glyph, shows the face flat.

5 
Girl
A repeated radial gradient, which draws the rings.

6 
Regional indicator A
A blue square, turned a little and moved by an affine transform.

7 
Regional indicator U
The A drawn inside it by PaintColrGlyph, with a red stripe over it.

8 
Black flag
The flag skewed, then rotated.

9 
Skin tone
A sweep gradient about the square's centre, from skin tone round to red at the left and back, drawn as a mesh of thin wedges.

10
Thumbs up
Turned about its centre and cut off by its clip box, so the top of the thumb is missing on purpose.

11 
Family
Three faces multiplied onto a yellow square.

12 
Flag of A and U
A linear gradient from blue to green, with a white stripe over it.

13 
Keycap 1
The digit cut out of a grey square by DEST_OUT.

14 
Thumbs up, skin tone
Moved, then squashed to 80% of its width.

15 
Flag of England
A white square from a Var paint, read as the paint it varies, and a red cross.
