Written with cssMode set to standard.

The heading: after a reset makes every h1 small, .invoice h1 reverts its size and margin. Standard: the title is large, with its built-in space below it. Legacy: it is small, and set right against the text below it.

The notice: its link takes the notice's red, bold text and drops the underline, and the reference inside it takes the notice's border. In both modes "pay online" is red, bold and not underlined: the legacy mode ignores a keyword on an inline element, which keeps the state of the text around it. Standard: "INV-0042" has a solid red border like the notice's. Legacy: it has no border.

The sender: strong is color: initial. Standard: "Blue Liquid Designs" is black. Legacy: it is dark blue like the text around it.

Invoice INV-0042

From **Blue Liquid Designs**, 1 Example Street.

Payment is due in 14 days: pay online quoting INV-0042.

The lines: the notes cell is color: unset, the total row's cells take the row's background, and the terms table nested in a cell reverts its cells' padding. Standard: the note is green, the table's colour; the total row is pale blue; the terms cells have thin padding. Legacy: the note is black; the total row's cells have no background at all, so the table's white shows; the terms cells have no padding.

Item	Note	Amount
Design	Two rounds of changes	1,200.00
Hosting	12 months renews in March	300.00
Total		**1,500.00**

The steps: a nested list takes its parent list's square markers, and the current step takes the list's dark blue over the grey of the items. Standard: every marker is a square, and "Approve the design" is dark blue. Legacy: the nested items have the default markers of a nested list, and "Approve the design" is black.
