HTML comments

Between two words

Reads "Bookkeeper", with no space.

Book<!-- hidden -->keeper

Between inline elements

Reads "Bookkeeper", with "Book" in bold and "keeper" in italics, and no space between them.

Book<!-- hidden -->*keeper*

In a table cell

The cell reads "Bookkeeper", with no space.

Book<!-- hidden -->keeper

In preformatted text

Three lines: "Bookkeeper" with no space, an empty line, and "keeper".

```
Book<!-- hidden -->keeper

keeper
```

A conditional comment

Reads "Bookkeeper", with no space and no "hidden".

Book<!--[if !IE]> hidden <![endif]-->keeper

A comment marker in a script

Reads "Bookkeeper", with no space and none of the script.

Book<script>var x = "<!-- hidden -->";</script>keeper

mPDF content

Reads "Shown only by mPDF, and Bookkeeper": the markers go and their content stays, and the comment inside it leaves no space.

Shown only by mPDF, and Book<!-- hidden -->keeper
