Descendant rules through inline ancestors

span em

Only the emphasis inside the quote span is red and bold. The emphasis outside it stays black.

He said it was ***never*** finished, and *meant* it.

.flag b, with the class on a span and on a paragraph

The bold words inside the span and inside the paragraph with the class are red. The bold word outside both stays black.

Plain text, a **flagged** span, and a **plain** bold word.
A flagged paragraph with a **bold** word.

a span

The span inside the link is blue on a light blue background. The span outside the link has neither.

A link with a span in it, then a span outside.

div span b, through a block and an inline element

Only the bold word inside the span is red. The bold word directly in the paragraph stays black.

Direct **bold**, then a span with **bold** in it.

span.x em.y strong, two inline ancestors

The strong text inside both is red. The strong text in em.y without the span stays black.

One *two* ***three*** and ***four***.

td span.badge b, an inline ancestor in a table cell

The bold text in the badge is white on red. The bold text outside the badge stays black.

Status: **OVERDUE**	**Plain bold**

td div.note i, a block inside a table cell

The italic text inside the note is red and bold. The italic text beside it stays black.

A note with ***italic*** text.
Italic outside the note.

table tbody td, with the tbody left out

Rows written straight into the table sit in a tbody: every cell is green.

R1 C1	R1 C2
R2 C1	R2 C2
