Legacy mode

Written with cssMode set to legacy. No text on this page is red.

Child and sibling combinators

.nav > li, .card-title + p and .card-title ~ .card-text are dropped: the items and paragraphs are the colour of the body text.

- Home
- Docs

Card title

Next paragraph

Card text

Structural pseudo-classes outside tables

li:first-child, li:nth-child(3) and li:first-of-type are dropped: no item is red or bold.

- First
- Second
- Third

Attribute selectors and an inherited language

a[href^="https"] is dropped, and p:lang(fr) matches only a paragraph with a lang attribute of its own, not one that inherits it: the link keeps its default blue, and the paragraph is the colour of the body text.

A secure link

A paragraph that inherits French

An inline ancestor, and :not(), :is() and :where()

.badge b through a span, .alert:not(.alert-info), :is(.btn, .badge) strong and :where(.card) .muted are dropped: nothing here is red.

Badge strong

A warning alert

Muted text

Shorthands

The border shorthand leaves the red top colour written before it: the button's top border is red, the others blue. The background shorthand leaves the repeat and position written before it: the tiger is drawn once, at the top right. The font shorthand leaves the line height and the small capitals the paragraph inherits: the lead paragraph is in small capitals, with double line spacing.

Button

A LEAD PARAGRAPH THAT RUNS OVER TWO LINES, TO SHOW THE SPACE BETWEEN THEM, AS IT INHERITS THE LINE HEIGHT THE SHORTHAND LEAVES IN PLACE.
