Type sized in rem

Written with cssMode set to legacy. Standard: html is 62.5% of the 11pt default, 6.875pt, so 1rem is 6.875pt. body is 1.6rem, 11pt, and this heading 3.2rem, 22pt. Legacy: html is dropped and rem is read against body, which is itself 1.6 times the default, so every size in rem comes out 1.6 times as large and this heading is 56pt. Standard: the text is sans-serif from html and near-black from :root. Legacy: serif and black.

Text

A lead paragraph at 2rem. Standard: 13.75pt, grey. Legacy: 35.2pt, grey.

Body text at 11pt in standard, 17.6pt in legacy. Small print at 1.2rem: 8.25pt in standard, 21.1pt in legacy.

Links

a:link against a, :visited and :hover. Standard: the link is green and underlined, as no link is visited or hovered in a PDF. Legacy: it is blue, only the a rule applying.

A link to the top

.nav a:not(:hover). Standard: the links are green, bold and not underlined. Legacy: blue and underlined, the rule dropped.

First Second

a.btn:link against .btn and .btn:hover. Standard: white on blue. Legacy: blue on white with a blue border, the :link and :hover rules dropped.

Buy now

Card

.card at 1.4rem, and .note in it at 0.8em of that. Standard: 9.6pt and 7.7pt. Legacy: 24.6pt and 19.7pt.

Card text.

A note in the card.

Table

table at 1.4rem and td.amount at 1.8rem. Standard: 9.6pt and 12.4pt, rem read against html inside the table too. Legacy: 24.6pt and 44.4pt, rem read against the table's own size.
