# Invoice INV-2026-0931

Written with cssMode set to legacy.

## Items

The thead sets white 8pt capitals, spaced 0.3mm, and its row is dark blue. Standard: the headers are white capitals. Legacy: they are dark grey, 9pt and as written, on the dark blue. In both, the th with class amount is right-aligned by its own rule and the others are centred.

Rows with class even are slate on grey, the overdue row is red italic, and the discount row is green at 90%, with a nested breakdown in its cell. Standard: each row's text takes its colour, style and size, and so does the nested table. Legacy: only the grey stripes show; the text is the body's.

| Description | Qty | Amount |
|---|---|---|
| Warehouse rental, September | 1 | 4,200.00 |
| Pallet handling | 312 | 1,560.00 |
| Pallet handling, August (overdue) | 280 | 1,400.00 |
| Cold storage surcharge | 30 | 450.00 |
| Volume discount<br>Handling -3%<br>Storage -2% | 1 | -380.00 |
| Subtotal | | 7,230.00 |
| Total due | | 7,953.00 |

The tfoot sets bold dark blue text aligned right. Standard: the totals are bold and blue. Legacy: they are the body's colour and not bold. In both, the amounts are aligned right and the labels left by their own rule.

## Payment terms

The rows sit straight in the table, and a rule for tbody sets slate 8pt text. Standard: the rows are in a tbody all the same, so the terms are slate and 8pt, and the bold th keep their centring. Legacy: they are the body's colour and size.
