Rules naming sup and sub

Written with cssMode set to legacy.

No rule: drawn at 55%, raised by half the size of the text around it and dropped by a fifth of it.

E = mc2 and H2O

p.colour sup, p.colour sub { color: #c00000 }: red.

E = mc2 and H2O

font-size: 75%: larger than the first case and raised and dropped as far.

E = mc2 and H2O

vertical-align: baseline: at 55% but on the baseline.

E = mc2 and H2O

normalize.css's rule for sub and sup: at 75% and on the baseline.

E = mc2 and H2O

sup { vertical-align: sub } and sub { vertical-align: super }: the 2 of mc2 dropped and the 2 of H2O raised, each moved once.

E = mc2 and H2O

td > sup { color: #c00000; font-size: 75% } in a table cell: red and larger under standard. Legacy reads no child selectors.

E = mc2

A class rule, .classed { color: #0050c0 }: blue.

E = mc2 and H2O
