mPDF

SVG text in an rgba() or cmyka() colour

The alpha of a fill or stroke colour is drawn on text as it is on shapes. Each line is set over blue, white and yellow stripes, which should show through the letters.

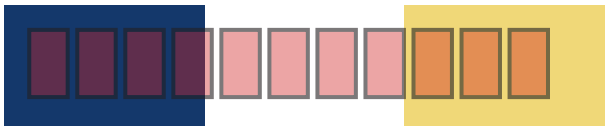
fill="#d02020" - opaque, for comparison

fill="rgba(208,32,32,0.4)"

fill="cmyka(0,85,85,0,0.4)" stroke="rgba(0,0,0,0.6)"

fill="rgba(208,32,32,0.8)" fill-opacity="0.5" - the two multiplied, 0.4

An SVG font, fill="rgba(208,32,32,0.4)" stroke="cmyka(0,0,0,100,0.6)"



A rect with fill="rgba(208,32,32,0.4)", which the text above should match
