Declarations mPDF cannot read

Lengths mPDF cannot read keep the default margins

Each blue box is indented 40px from both sides and has space above and below it, as the first one does with no margin declared.

Default margins

margin: calc(5mm + 5mm)

margin: 1mm 2mm var(--gap) 4mm

margin-left: 1,5mm

margin: min(1mm, 2mm), in a style attribute

An earlier declaration still applies

Both bars are the same width as the yellow one, 60mm, rather than the width of the page.

60mm

width: 60mm; width: calc(100% - 10mm)

width: 60mm; width: 50dvw

Colours mPDF cannot read keep the inherited colour

Every line is green; none is black.

Inherited green

color: bogus

color: var(--brand)

color: oklch(0.7 0.1 120)

color: #zzzzzz, in a style attribute

Units relative to the page, and quarter-millimetres

Each blue bar is as wide as the yellow bar above it, not a few millimetres wide.

105mm, half the width of the A4 page

width: 50vw

width: 50vmin

148.5mm, half the height of the A4 page

width: 50vh

width: 50vmax

100mm

width: 400Q

The blue bar starts 5vw, 10.5mm, in from the yellow one.

No margin

margin-left: 5vw
