

Block height and overflow

Percentage heights

A 30mm grey box; the red box inside it is 15mm tall, half of it.

A red box one line tall: with no height on its parent, 50% is auto.

Fixed boxes

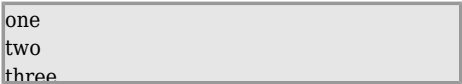

A 12mm grey box with one line of text at the top and space below it.

A 10mm grey box; the six lines run on below its bottom border, over the gap before the next caption.

A 10mm grey box showing only its first two lines and the top of the third; the rest is clipped.

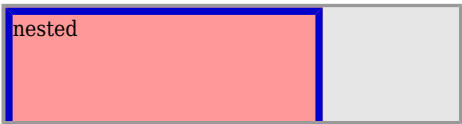

A 16mm grey box, 3mm of padding inside its border, showing its first three lines; the clip is the padding box, so the text starts 3mm inside the border.

Nested blocks

A 15mm grey box; the red box inside it, with a blue border, is cut off at the grey box's bottom edge, with no bottom border.

A 15mm grey box; the red box inside it runs on 32mm below the grey box's top, over the gap below.
