Text after a block in a table cell

Text that follows a block in a cell is shaped like any other text. In each row the right cell draws the same glyphs in the same places as the left one, under a small block.

Script	Alone in its cell	After a block
Arabic, left to right	بِسْمِ اللَّهِ	Block بِسْمِ اللَّهِ
Arabic, right to left	بِسْمِ اللَّهِ	Block بِسْمِ اللَّهِ
Arabic marks	بِسْمِ اللَّهِ	Block بِسْمِ اللَّهِ
Latin marks	x́ýq̣	Block x́ýq̣
Devanagari	क्षि र्कि द्रु	Block क्षि र्कि द्रु
Thai	ที่นี่ น้ำ	Block ที่นี่ น้ำ

Kerning is applied once

Text with no kerning of its own falls back to the font's kern table, for that text only. The pairs in the second line are as close as those in the first, not twice as close.
