groove, ridge, inset, outset

Blocks

3mm in #3366cc, a dark grey-blue and a pale blue. Groove: dark outside and pale inside along the top and left, the other way round along the bottom and right. Ridge: the reverse. Inset: dark along the top and left, pale along the bottom and right. Outset: the reverse. The tones meet on the diagonals of the corners.

groove

ridge

inset

outset

The same groove in a table cell, drawn by the table code: the same two tones on the same sides, its corners overlapping rather than meeting on the diagonals.

groove cell

border-radius: 5mm, 4mm groove: both rings follow the rounded corners.

rounded groove

Inset in red, 1mm top, 3mm right, 5mm bottom, 2mm left: each side as wide as given, the corners cut on the line between the outer and inner corner.

uneven inset

Outset in rgba(51, 102, 204, 0.4) on a yellow block: the yellow shows through both tones, the pale one a light yellow and the dark one an olive.

translucent outset

A fieldset with a groove border: its legend sits in a gap in the top border.

fieldset

Inline elements

Ridge 1mm round a span on a yellow background, and outset 1mm round a span that wraps: no left side on the second line and no right side at the end of the first.

Before ridge and an outset span that goes on long enough to wrap after.

Images

A 3mm groove round the first picture and a 3mm outset round the second, rounded 5mm.
