Objects after a byte order mark

Each sample below starts with U+FEFF, as a template saved with a byte order mark would output after a style block. The mark draws nothing and no text is left around it. The object named by each caption has to appear under that caption.

An image

A barcode

A text input

Filled in

A dotted leader before a word

..... after

A rule

A meter, half full

A text circle

Circle

An image in a table cell

An image after a paragraph holding only the mark
