Attribute values holding "name=value"

In a text field

A " name=value" in the value: the box reads "Set x=1 first".

Set x=1 first

A " src=" in the value: the box reads "see src=a.png now".

see src=a.png now

A single-quoted value after "=" in the value: the box reads "a='b' c".

a='b' c

Matched by a selector

A title holding " name=value": the next line is green.

Green text

A data attribute holding two of them: the next line is green.

Green text

An unquoted title with an apostrophe: the next line is green.

Green text

A link whose title holds " href=", then the same link without it: both links are green and underlined.

With the title and without it
