The @page rule only sets margin-top: 30mm. This page should show the header "Header from SetHeader()" and the footer "Footer from SetFooter() 1".

The named page "chapter" has header: html_chapter. This page should show the red "CHAPTER HEADER" in place of the header from SetHeader(), and keep the footer "Footer from SetFooter() 2".

Back on the unnamed page. This page should show the header "Header from SetHeader()" again and the footer "Footer from SetFooter() 3".

The named page "nofooter" has footer: _blank. This page should show the header "Header from SetHeader()" and no footer.
