opacity and transform

Opacity on a block

opacity: 0.3 on a red block: pale red, with grey text that has no red behind its letters.

FADED BLOCK

opacity: 0.5 on a block holding a red box and a blue box that overlaps it: where they overlap is the same pale blue as the rest of the blue box.

opacity: 0.5 on a block holding two black boxes, the lower with opacity: 0.5 of its own: the upper box is mid grey, the lower a paler grey, a quarter as dark as black.

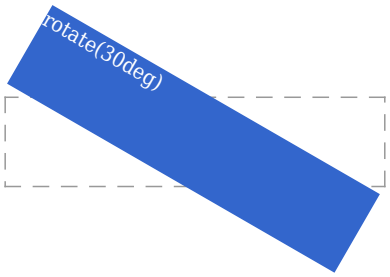
Opacity on inline elements

Opaque, half quarter and opaque again.

Transform on a block

Each blue box is drawn over a dashed outline of where it is laid out.

rotate(30deg): turned clockwise about the centre of the outline.



scale(0.5) with transform-origin: left top: half size, in the top left corner of the outline.

translate(60mm, 0): beside the outline, to its right.

translate(60mm) rotate(-15deg) skewX(20deg): to the right of the outline, slanted and turned anticlockwise.

translate(60mm) rotate(-15deg) skewX(20deg)

Opacity across a page break

opacity: 0.4 on a green block that runs onto the next page: pale green on both pages, its text grey.
