Heading

Text loose after the heading, in no paragraph of its own.
Next paragraph.

Case 2. The loose text fits under the heading, the next paragraph does not: the heading and the loose text stay at the foot of this page, and the next paragraph starts the next page alone.

Heading

Text loose after the heading, in no paragraph of its own.

Case 4. A block nearly a page tall, kept with a line holding a 15mm image: the two cannot share a page, so the block stays on this page and the line starts the next, with no blank page between.

Tall block

 A line with a 15mm image.

Case 5. A block nearly a page tall, kept with a line made tall by a span with line-height: 5: the block stays on this page and the line starts the next, with no blank page between.

Tall block

A line with a span with line-height: 5.

Case 6. The HTML ends with loose text after the heading, which does not fit under it: the heading and the text both stand at the top of the next page.
