Framework utilities marked !important

Written with cssMode set to standard.

A utility against an id

.text-success and .fw-normal against #sidebar p. Standard: the first line is green and not bold, the utilities beating the id. Legacy: it is grey and bold like the second, the descendant rule coming last.

With the utilities

Without them

A utility against the inline style

.text-success against style="color: grey". Standard: the first line is green. Legacy: it is grey like the second, the inline style coming last.

With the utility

Without it

An inline !important against a utility

style="color: green" against .text-muted, with and without !important. Both: the first line is green. Standard: the second line is grey, the utility beating the inline style that is not important. Legacy: it is green too.

Styled inline with !important

Styled inline without it

Two utilities

.text-success and .text-primary, both !important and as specific, .text-primary written later. Standard: the line is blue, the later rule winning. Legacy: it is green, classes applying in alphabetical order.

Both colour utilities

A spacing utility against a component

.m-0 against .card p. Standard: the first paragraph sits against the top of the card, with no margin. Legacy: it has the 4mm margin of the second, the descendant rule coming last.

With .m-0

Without it

Hidden by a utility

.d-none against #promo { display: block }. Standard: only "Visible alert" is drawn. Legacy: "Hidden alert" is drawn above it, the id coming last.

Visible alert

Border and background utilities against an id

.border-0 and .bg-light (a background shorthand) against #notice. Standard: the notice has no border and a light grey background. Legacy: it has a thick dark red border and a pink background, the id coming last.

A notice

A utility in a table

.text-end against .table td. Standard: the amounts are right-aligned. Legacy: they are left-aligned, the descendant rule coming last.

Item	Amount
Consulting	1,200.00
Hosting	300.00

A utility against a component inside an id

.bg-success against #checkout .btn. Standard: the first button is green. Legacy: it is purple like the second, the descendant rule coming last.

With .bg-success Without it
