mPDF

Three ways of numbering the pages, in one index

The preface and the contents are numbered in lower-case roman. The chapters carry the count on in arabic, and the appendices restart at A. The same terms recur across all three, so the index at the back lists them side by side, each as the page it ends up on once the contents is moved into place.

Preface 1

This is preface page 1, on page i.

This page covers: scope, method.

Preface 2

This is preface page 2, on page ii.
