line-height on inline elements

Values

A normal first line, for comparison: each line is about 5.6mm high.

First line
Second line

line-height: 20mm on the red span: the first line is 20mm high, with the text in its middle; the second line is normal.

First line

Second line

line-height: 3 on the red span: the first line is three times the 12pt font, 36pt (12.7mm), high.

First line

Second line

line-height: 250% on the red span: the first line is 30pt (10.6mm) high.

First line

Second line

line-height: normal on the red span, in a paragraph with line-height: 0.5: the first line is normal, the second is half the font size, so its text runs over the bottom of the blue background.

First line
Second line

Taller and shorter than the block

A paragraph with line-height: 10mm and a red span with 20mm: the first line is 20mm high.

First line

Second line

The same paragraph with a red span of 2mm, alone on its line: the first line stays 10mm high, like the second.

First line

Second line

The same with line-height: 0 on the red span: both lines are 10mm high.

First line

Second line

Inheritance and mixed sizes

line-height: 2 on a span holding a red 20pt span: the number is inherited as a number, so the first line is 40pt (14.1mm) high.

First line

Second line

line-height: 2em on the same span: the length is worked out at the outer span's 12pt and inherited as 24pt, so the first line is 24pt (8.5mm) high.

First line
Second line

A red 30pt span with line-height: 1: the first line is 30pt (10.6mm) high, shorter than a normal 30pt line, so the large text reaches the top of the blue background.

First line
Second line

A 20pt span, a red span with line-height: 20mm and a small span on one line: the first line is 20mm high.

First big tall small

Second line

vertical-align

The red span has line-height: 10mm and vertical-align: 50%, so it is raised 5mm above the baseline, and the first line grows to hold it.

raised
First
Second line

An image

A small image in a span with line-height: 20mm: the first line is 20mm high, and the image sits on the baseline.

First

Second line

Table cell

line-height: 20mm on the red span in the first cell: its first line is 20mm high, and the whole row grows with it.
