mPDF

A substitution subtable over 32 KB

Each of these characters is replaced by a run of fifteen markers with the character itself in the middle. The markers draw nothing, so a row shows the shape of the character that was typed - unless the record was read from the wrong place, in which case the character is gone and the row is blank.

square U+E000 - Sequence 2,006 bytes in

triangle U+E001 - Sequence 2,040 bytes in

diamond U+E3E6 - Sequence 35,948 bytes in - past 0x8000

bar U+E3E7 - Sequence 35,982 bytes in - past 0x8000
