A right-to-left letter in a left-to-right paragraph

Each pair reads right to left, so the first letter typed is the one on the right. The paragraphs are not marked with a direction - the letters carry their own. Compare the first sample with the second: the letter after the Beh belongs on the left of it, and the two samples have to agree on that.

Beh, Low Alef - the Low Alef left of the Beh

Beh, Alef - a letter strong throughout, the form to match

Beh alone
