:not(), :is() and :where()

p:not(.a)

Every paragraph but the one with class a is red and bold.

Class a
Class b
No class

p:not(.a, .b)

Only the paragraph with neither class is red and bold.

Class a
Class b
Class c

li:not(:first-child)

Every item but the first is red.

- First
- Second
- Third

p:not(section > p)

The paragraph directly inside the section stays black; the others are red and bold.

In the box
Directly in the section
In a div in the section

:is(h3, h4) + p

The paragraphs right after the h3 and the h4 are blue and bold. The one after the h5 and the one after a paragraph stay black.

An h3
After the h3
An h4
After the h4

An h5

After the h5
After a paragraph

p:is(.lead, #intro)

The paragraph with class lead and the one with id intro are blue and bold. The third stays black.

Class lead
Id intro
Class note

:where(ul, ol) > li

The items of both lists are green.

- Bullet

1. Number

td:not(:first-child)

Every cell but the first of each row is yellow.

R1 C1	R1 C2	R1 C3
R2 C1	R2 C2	R2 C3
