Media queries on a portrait A4 page

Media types

The queries containing print apply: the first paragraph is green and bold, and the third large and red. not screen and screen do not: the second and fourth are black at the normal size.

@media print

@media not screen

@media not print

@media screen

Orientation

Both queries contain print, so both apply whatever the page: the first paragraph is green and bold, the second large and red.

@media print and (orientation: portrait)

@media print and (orientation: landscape)

Width

No query contains print or all, so none applies: all four paragraphs are black at the normal size.

@media (min-width: 768px)

@media (700px <= width <= 800px)

@media (max-width: 768px)

@media (min-width: 1000px)

Unknown features and media attributes

The (hover: hover) query contains neither print nor all: the first paragraph is black at the normal size. The media attribute not print contains print, so its block applies: the second paragraph is large and red.

@media (hover: hover)

<style media="not print">

Media queries on a landscape A4 page

The queries containing print apply whatever the page, and the width query does not: the first paragraph is green and bold, the second black at the normal size, the third large and red.

@media print and (orientation: landscape)

@media (min-width: 1000px)

@media print and (orientation: portrait)
