A nested lookup's advance and a deletion

Read each row against its label. The Y is the second glyph the A B C context expands the B into, and should be left as itself rather than drawn as a Z. The D should be gone rather than drawn as a Q, and the J left as itself rather than drawn as an R.

ABCE → AXYCE	AXYCE
ABC → AXYC	AXYC
DE → E	E
D → nothing	
GHIJ → HIJ	HIJ
GHI → HI	HI
