What a kept block moves with it

Two blocks below are kept together. The first fits where it is; the second does not and moves to the next page whole. Each holds the same content: numbered lists in four styles, one of them starting at three, a bulleted list with nested levels, a picture in the running text, and a table with a header row. The numbers and markers are what they would be had the block not moved, and every picture and row appears once.

This block stays. It is on page 1.

3. Decimal, starting at three
4. Four
5. Five

a. Lower alpha
b. Second
c. Third

I. Upper roman
II. Second
III. Third

α. Lower greek
β. Second
γ. Third

- Disc
  - Circle, one level in
    - Square, two levels in
  - Circle again
- Disc again

 A picture in the running text of the block that stays.

Row	In the block that stays
1	First row
2	Second row
3	Third row

Last line of the block that stays.

Filler line 1 before the block that moves.

Filler line 2 before the block that moves.

This block moves. It is on page 2.

3. Decimal, starting at three
4. Four
5. Five
