mPDF

A kept block over a table kept together

Each dashed block below is kept together, and so is the table inside it. The table cannot split, so when the block is measured it jumps whole to the next page and leaves the foot of this page blank. That blank strip is not part of the block.

Filler line 1, so that the first block starts well down the page.

Filler line 2, so that the first block starts well down the page.

Filler line 3, so that the first block starts well down the page.

Filler line 4, so that the first block starts well down the page.

Filler line 5, so that the first block starts well down the page.

Filler line 6, so that the first block starts well down the page.

Filler line 7, so that the first block starts well down the page.

Filler line 8, so that the first block starts well down the page.

Kept line 1. This block fits a page, so it moves to the next one whole.
Kept line 2. This block fits a page, so it moves to the next one whole.
Kept line 3. This block fits a page, so it moves to the next one whole.
Kept line 4. This block fits a page, so it moves to the next one whole.
Kept line 5. This block fits a page, so it moves to the next one whole.
Kept line 6. This block fits a page, so it moves to the next one whole.
Kept line 7. This block fits a page, so it moves to the next one whole.
Kept line 8. This block fits a page, so it moves to the next one whole.
