Form fields in a kept block

Two blocks below are kept together, each holding a form with every kind of field. The first fits where it is; the second does not and moves to the next page whole, and its fields with it. Every field appears once, on the page its block ends up on, with the value it was given.

This block stays. It is on page 1.

Text	In the block that stays
Password	******
Text area	Three rows of text area, in the block that stays.
Select	Second option, selected
Checkboxes	☑ Checked ☐ Not checked
Radio	◉ Yes ○ No
Buttons	Submit Reset
