Font values computed from the parent's

font-weight: 700, 600 and 500. The first two lines are bold; the third, below 600, is regular.

Weight 700: bold
Weight 600: bold
Weight 500: regular

bolder inside bolder, then lighter: 700, 900 and 700. All three lines are bold.

bolder: 700, bold
bolder again: 900, bold
lighter: 700, bold

lighter inside 700, then lighter again: 400 and 100. Only the first words are bold.

Weight 700, lighter: 400, lighter again: 100

bolder inside 300, then bolder again: 400 and 700. Only the last words are bold.

Weight 300, bolder: 400, **bolder again: 700**

A heading set lighter steps down from its parent's normal weight, not from its own bold: the heading is regular.

A lighter heading, regular
A heading, bold

b and strong are bold. font-weight: normal inside b is regular, and lighter inside strong steps down to 400, regular, with a b inside it bold again.

Bold, normal inside b, **bold**
Strong, lighter inside strong, **b inside that**

A table at weight 600: the cells set lighter, a header cell and a data cell, are regular at 400, and the others bold.

Lighter header cell: regular	**Header cell: bold**
600 from the table: bold	lighter: 400, regular

The font shorthand's weights: 600 is bold, lighter inside it regular, and bolder inside that bold.

font: 600, bold
font: lighter, regular, **font: bolder, bold**

font-size: larger and smaller from 10pt: each larger is 1.2 times its parent's size, each smaller its parent's divided by 1.2.

10pt
larger: 12pt
larger again: 14.4pt, smaller: 12pt, smaller again: 10pt

A table set larger, in a 9pt body: its first cell is 10.8pt, and a cell set smaller is back to 9pt.

Larger table: 10.8pt	Smaller cell: 9pt
