Strings, url() and escapes in a stylesheet

An @import with semicolons in its url()

The @import ends at the semicolon after its url(): the paragraph is green and bold.

After the @import

Braces in a string

The first paragraph is blue and italic, the second green and bold.

Braces in quotes

After the rule

A brace in a string with no brace to pair with

The first paragraph is blue and italic, the second green and bold.

One brace in quotes

After the rule

A declaration in a string

The string is a font name, not a color: the first paragraph is blue, in a monospace font; the second green and bold. None is red.

`Semicolons in quotes`

After the rule

An escaped quote in a string

The first paragraph is blue and italic, the second green and bold.

An escaped quote before a brace

After the rule

Comment markers in strings and url()

A /* in a string, closed by a */ in a later string, and a /* in an unquoted url() before a real comment, start no comment: each first paragraph is blue and italic, each second green and bold.

A comment opener in quotes

After the rule

A comment opener in url()

After the rule

A string left open

The string ends at the line break, taking the brace with it, and the declaration on the next line applies: the first paragraph is blue and italic, the second green and bold.

A string with no closing quote

After the rule

Escapes in selectors

.md\:italic and .a\{b\} match the classes md:italic and a{b}: the first two paragraphs are blue and italic, the third green and bold.

class="md:italic"

class="a{b}"

After the rules

A brace in an attribute selector

p[title="{"] matches the first paragraph, which is blue and italic; the second is green and bold.

title="{"

After the rule

Braces and a semicolon in an unquoted url()

The url() is one value: the first paragraph has a yellow background, the second is green and bold.

Braces in url()

After the rule

A rule and an at-rule nested in a block

Each is left out and the declarations after it apply: the first two paragraphs are blue and italic, with no red, and the third green and bold.

*A rule nested in the block, with **bold** text*

An @media screen block nested in the block

After the rules

Each stylesheet on its own

A block left open ends with its <style>, and the next one starts afresh: the first paragraph is blue and italic, the second green and bold.

In a block left open

In the next <style>

A byte order mark

A stylesheet starting with a byte order mark and @charset: the paragraph is green and bold.

After the byte order mark
