Descendant rules reaching into table cells

Pictures sized by td img and td.thumb img

Three 60mm columns. The first two pictures fill their cells; the thumbnail stops at 20mm with rounded corners.

		

Tag and class chains

Red bold words from table.chain tr td span; yellow highlight from .grid .row .cell .mark.

Plain, **red and bold**, plain	Plain, **highlighted**, **both**

Blocks in a cell, chosen by the cell's class

Blue italic paragraph and green list items in td.note; magenta paragraph in td.plain; nothing in the unclassed cell.

A note paragraph • First item • Second item	A plain paragraph	An unstyled paragraph

Rules naming a block outside the table

Purple underlined emphasis from div.report td em; the div.elsewhere rule, which would make it large and red, does not apply.

Some *emphasised* words

A table nested in a cell

Orange bold in the inner table from td.outer td b; the bold directly in the outer cell, not in a td inside it, stays black.

Outer bold Inner **bold**

Header, body and footer cells

White on blue in the header, green notes in the body and brown italic in the footer.

Row	Description
1	Row 1 (note 1)
2	Row 2 (note 2)
3	Row 3 (note 3)
End of the table	

A table in a positioned block

White on teal words from #side td span, in the block positioned at the bottom right of this page.

Fixed cell text
