Blurred text-shadow

No blur: one sharp red copy, down and to the right.

0.5mm blur: a red copy down and to the right with a narrow soft edge.

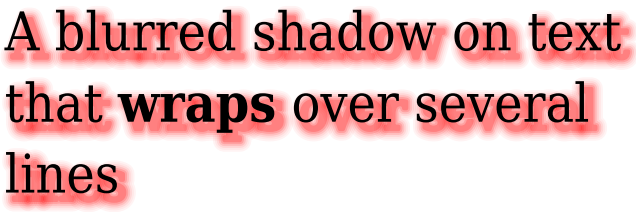
1mm blur: the same copy, softer and spreading further.

2mm blur: a soft red haze, with no hard edge anywhere.

4mm blur: a wide grey cloud around the text, reaching furthest down and to the right.

No offset: a blue glow evenly all round the text.

A 40% red: a paler haze than the 1mm and 2mm ones above.

Two shadows: a sharp blue copy up and to the left, and a soft green haze down and to the right.


A paragraph that wraps over three lines: every line has the same soft red haze, the bold word too.
