Spot colours through a pass that is unwound

The next page is the contents. Its entry has to be green.

Contents

The entry below, with its page number, is in the green spot colour.

The index 3

This page is here to be indexed.

Ink 3

This paragraph after the index is in the magenta spot colour, not the contents' green.

A tall block, so that the next one does not fit under it.

This block moved to a page of its own, and is in the cyan spot colour.

It runs to several paragraphs.

So that it does not fit under the block above.

And has to move.
