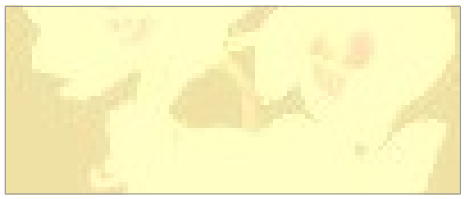
Background shorthand

A colour after the image

background: url(bg.jpg) no-repeat #99ff99. The image at the top left, once, on a light green box.

A size after the position

background: url(bg.jpg) no-repeat center / cover. The image fills the whole box, cut at its top and bottom.



background: #ffcc99 right bottom / 25% url(bg.jpg) no-repeat. A small image, a quarter of the box wide, in the bottom right corner of an orange box.

Origin and clip

background: content-box #ffcc99 url(bg.jpg) no-repeat, on a box with 5mm padding. The orange and the image start 5mm inside the grey border, leaving a white frame.

Two layers

background: url(bg.jpg) no-repeat, #ccccff. The image at the top left, once, on a light blue box: the colour is the last layer's.

A background that is not a background is dropped

background: url(bg.jpg) bogus is dropped, so the light green of the earlier rule stays, with no image.
