# @page margin boxes

Page 1, the first page. The @page :first rule takes the top-center box's content away and numbers the bottom-center box in upper-roman.

Header: "Margin boxes" in bold blue at the left, nothing in the middle, "Page 1 of 3" at the right. Footer: "Page I in upper-roman" small and grey, centred.

Page 2, a plain page, with every box of the plain @page rule.

Header: "Margin boxes" in bold blue at the left, "Running header" in the middle, "Page 2 of 3" at the right. Footer: "- 2 -" small and grey, centred.

Page 3, the named page appendix, whose rule gives the top-center box its own content and style and adds a bottom-right box.

Header: "Margin boxes" in bold blue at the left, "Appendix" in italic red in the middle, "Page 3 of 3" at the right. Footer: "Page III in upper-roman" small and grey in the middle, as mPDF takes the first page of a named page for a :first page too, and "Appendix footer" at the right.
