This document is set in DejaVu Sans and rendered with the font cache empty for its backup fonts: DejaVu Sans Condensed, FreeSans, Garuda and Khmer OS, tried in that order. The Thai below is drawn in Garuda and the Khmer in Khmer OS; DejaVu Sans Condensed and FreeSans have neither and draw nothing. The last line lists the fonts the document holds, which should be DejaVu Sans, Garuda and Khmer OS only. Before the fix, every backup font tried was added to the document on a cold font cache.

Thai: ภาษาไทย

Khmer: ភាសាខ្មែរ

Fonts in the document: dejavusans, garuda, khmeros
